1. GENERAL

This instruction applies to everyone involved in the storage, warehousing, or transportation of products manufactured by AS Viljandi Aken ja Uks. Compliance with the requirements of this instruction is a prerequisite for maintaining the product warranty.

2. STORAGE AND WAREHOUSING OF PRODUCTS

2.1. Storage and warehousing are permitted:

- in a dry and well-ventilated room;
- protected from direct sunlight and daylight;
- in the factory packaging and placed on the original pallet;
- on a level and stable surface;
- protected from precipitation, dust, and damage.

2.2. The following is prohibited during storage and warehousing:

- stacking pallets on top of each other;
- storing products directly on the ground;
- storing products in areas subject to significant temperature fluctuations;
- storing products in a tilted position leaning against a wall;
- storing products against or near heating devices;
- placing other objects on top of the products;
- storing products in damp or humid rooms.

3. TRANSPORTATION OF PRODUCTS

- products must be transported on factory pallets or support beams;
- individual products may be transported in the manufacturer's original packaging;
- heavy products must be lifted using a forklift or other suitable lifting equipment;
- pallets must not be lifted with lifting slings without a lifting spreader beam;
- products must not be dragged or carried around corners during transportation;
- products must be protected against impacts and falling;
- no other objects or additional loads may be placed on the products during transportation;
- during transportation, products must be protected from precipitation and dirt.
